
Site Supervisors Safety Training Scheme (SSSTS)

Course length: 2 Days

Additional work: None

Level: Basic

Delivery: Classroom

Pre-Qualifications: None

Venues: Nationwide or In-House

Overview

This course is an ideal foundation for obtaining a basic understanding of health & safety duties and responsibility for junior management, upon successful completion of this course a natural progression would be the five day site management safety training scheme (SMSTS) course.

Target Audience

This course is designed for first line managers, foremen, gangers, team leaders and supervisors. It is for those who have, or about to acquire, supervisory responsibilities.

Assessment Process

Continuous support and personal mentoring throughout.

Aims

It provides an introduction to health & safety, welfare and environmental issues for those requiring an understanding of their legal responsibilities relevant to their work activities. It will provide a sound knowledge base to enable them to give valuable assistance in safely managing a construction site.

Additional Notes

Our training is guaranteed to be incredibly effective in creating a safer working environment. Successful candidates will be awarded the CITB Site Supervisors Safety Training Certificate.

Syllabus

The course covers The Health & Safety at Work Act and the regulations relevant to the construction industry, including:

- CDM Regulations
- Developing a Health and Safety Management System
- Occupational Health
- Fire Prevention and Control
- Risk Assessment and Method Statements
- Hazardous Substances
- Working at Height and Personal Protective Equipment
- Health and Safety Law
- Manual Handling
- Accidents and First Aid

At the end of the course, delegates will be able to:

- Understand problems of the industry, and how to solve them
- Explain how health and safety law is structured, and how it should be applied
- Identify how their supervisory role fits in with the manager in controlling the site
- Carry out risk assessments, produce reports and understand the need for method statements
- Carry out site inspections and toolbox talks
- Understand what is meant by proactive and reactive monitoring and appreciate their need
